

FabTek Capabilities

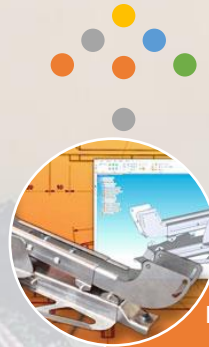

Fabtek provides sheet metal pressing, cutting, folding, welding and fabrication services for specialist clients in the manufacturing, service and security industries, as well as other companies and individuals who have something very specific they need custom made. If you have a product in mind that you want to develop and manufacture – in runs of any size, manufactured in mild steel, aluminium or stainless steel, we can help turn your ideas into reality.

We will provide experienced advice in the development of your product, ensuring you receive a working prototype, with the flexibility to further refine it for successful production runs by us or others.

We offer a service that is:

-  Personal
-  Fast
-  Affordable
-  Knowledgeable
-  Flexible, and
-  Customized to meet your requirements

When you work with us, you can be confident that you will own your design and the drawings for it – your intellectual property remains your own.
